

Getting Started Guide

What's Included

Explorer Kit and Creator Kit sold separately

Break apart components before first use

Arrange components as shown above to store back in case when not in use

Be Safe

- Never place near things that get hot
- Never sit on, climb on, or jump on
- Never build structures too tall
- Never enclose a person or animal

Usage

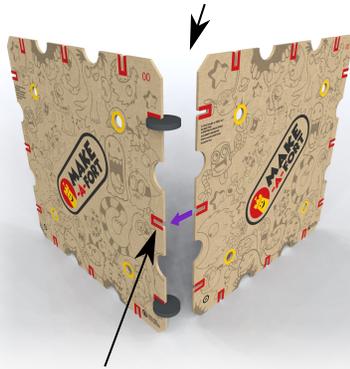

- Avoid getting wet
- If components get bent, just straighten as needed
- Experience marks on connectors is normal and expected
- Color the components with crayons, markers, or paint

Getting Started Guide

Tips

Always start with a corner

Skip middle slots to reduce connector usage

This structure will be very weak

Replace small components with big components to make stronger

Add braces to make stronger

Add perpendicular components to make stronger

Match yellow slots with yellow slots

Match red slots with red slots

Structures are designed to flex when bumped
